

ROXANA STANCU

Junior Software Developer | Backend, Automation and Systems

ioanaroxana.st@gmail.com | +34 670 979 653 | github.com/esettes

Madrid, Spain | Hybrid Madrid / Remote Spain

Junior software developer with professional experience building internal automation tools, a Higher Technician in Cross-Platform Application Development and ongoing project-based training at 42 Madrid. Builds backend and systems software with C/C++, Python, Rust, Node.js and Linux. Use of AI, Codex and coding agents for code review, testing, debugging and documentation. From the school of programming best practices and clean code.

TECHNICAL SKILLS

Languages: C, C++, Python, Rust, TypeScript, JavaScript, C#

Backend & data: Node.js, Express, HTTP/REST APIs, WebSocket, SQLite, SQL

Systems & tools: Linux/Unix, TCP/IP, Bash, Shell, Git, Make, Docker, SSH, GDB, Valgrind

Testing & deployment: Automated testing, CI/CD, Playwright, debugging, Caddy, HTTPS/TLS, WireGuard, DDNS

SELECTED PROJECTS

Real-time self-hosted chat | <https://baky.dedyn.io> | Node.js, Express, WebSocket, SQLite

- Built a real-time backend with WebSocket rooms, SQLite persistence and HTTP endpoints; deployed it behind Caddy with HTTPS/TLS, DDNS, WireGuard and remote SSH administration in my own home linux server.

pic16cc - Native C compiler for PIC16 | github.com/esettes/PIC16_compiler | Rust

- Designed an end-to-end compiler pipeline with preprocessing, parsing, semantic analysis, typed IR, optimization, code generation, Intel HEX output and simulator-backed automated tests.

Trascendence - Collab. database platform | github.com/notion-database-sys | Typescript, Fastify, WebSocket, MongoDB/PostgreSQL, Docker

- Group project. Full-stack Notion clone with 10+ database views, a block-based page editor, a Rust/WASM formula engine, and multi-user real-time collaboration via WebSocket.

ft_irc - IRC server | github.com/esettes/42-ft_irc | C++, TCP/IP

- Building a multi-client IRC server with non-blocking sockets, persistent I/O buffers, command parsing, registration handling and graceful connection cleanup.

PROFESSIONAL EXPERIENCE

Developer - Rivamadrid | 2022 - 2023

- Automated Google Workspace workflows and developed internal utilities using JavaScript, Google APIs and Excel/VBA.
- Gathered user requirements, proposed practical solutions and acted as the technical point of contact.

Developer - WIGES | 2021 - 2022

- Contributed to Vera y la maldición de los medios in C# and Unity, including testing and technical documentation.

EDUCATION

Software Development - 42 Madrid | 2023 - Present

Project-based training in C/C++, Unix, networking, algorithms, concurrency, cybersecurity, Python and Docker.

Higher Technician in Cross-Platform Application Development - IFP | 2019 - 2021

LANGUAGES

Spanish: Native | Romanian: Native | English: B2 (Upper-intermediate)
